Advantages:

Reliability

You can enjoy peace of mind in knowing that your end user data is backed up utilizing the highest standards of reliability.

Scalability

While other backup providers are limited by storage constraints, we can easily scale to accommodate millions of users.

Feature Rich, Intuitive

Not only will your IT department appreciate our robust set of features, your end users will appreciate the intuitive, simple-to-use interface as well.

Saratoga Remote Backup - Simple, Automatic, Secure

From small businesses to large corporations, the critical task of PC backup can be an expensive and challenging endeavor. Fortunately, Saratoga has made enterprise class backup possible for everyone with an affordable, secure, solution that's simple to manage and even easier to use. Whether you're the CTO of a Fortune 100 corporation or a small business owner Saratoga is your enterprise solution for remote data backup.

Your IT department will appreciate the way Saratoga seamlessly integrates into your organization's existing infrastructure and your finance department will appreciate the fact that Saratoga doesn't require any additional capital expense for tapes, CD's, or hardware.

Robust Feature Set

Feature	Benefit
Open/locked file support	No need to close files in order to back them up as our solution backs up all open and locked files including Outlook .pst files.
128-bit SSL encryption	Safely secures your data during transport.
448-bit Blowfish encryption	Safely secures your data on Berkeley Data Systems servers.
Automatic or scheduled backup	Tell us when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.
Continuous Data Protection	Automatically detects and backups new and changed files every 2 hours.
Block level incremental backups	Saves bandwidth and ensures future backups are lightning fast.
Bandwidth throttles	Throughout the day, you can choose to use more or less of your upload bandwidth so other high priority services can run unimpeded.
Version (snapshot) support	Users have the option of restoring from multiple file versions up to 30 days in the past.
Public private encryption key options	You have the choice of using 448-bit key or managing your own private key to encrypt your data.
